

Novel LEX Repeatable Platform for Generating Best-in-Class Product Candidates

Enhanced Performance

- Optimizes glycosylation to enhance efficacy and potency and reduce side effects

Complex Processing

- Efficient production of complex proteins
- Protein refolding not needed

Lower Cost of Entry

- Low capital requirements
- Low operating expenses
- Shorter lead times

Freedom to Operate

- Novel protein production method
- Broad freedom to operate

LEX System Advantage

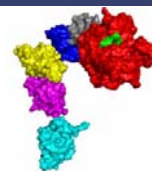

Product Example

BLX-301

- Optimized for enhanced efficacy and potency

BLX-155

- No other system can produce rhPlasmin

- Benefits our entire pipeline
- Allows multiple parallel programs

Locteron

- Freedom to use proven interferon
